

**If 10 oranges weigh around 1 kg,
how much does each orange weigh?**

1 kg = 10 oranges

1000g = 10 x ~~100g~~

10 oranges = 

 picture version

$$10 \times \text{---} g = 1000g$$

Maths version

$$\frac{1000}{10} = 100g$$

$$= 100g$$

Answer 100 grams (g)
(1 orange)
